COOKIE NOTICE

ITPACK SHIELD – www.itpackshield.com

Effective: 26 September 2026

Last updated: 26 September 2026

1. Purpose of this Notice

This Cookie Notice explains the cookies and similar technologies used on www.itpackshield.com (the “Website”), their purposes, retention periods and providers, and identifies which technologies require the visitor’s prior consent.

The Website is operated by:

Heftner Group Kft.

Registered office: 2013 Pomáz, Vróci utca 12., Hungary

Company registration number: 13-09-123295

Tax number: HU12710658

Email: sales@it-pack.com

Website: www.itpackshield.com

Detailed information on the processing of personal data is provided in the Website’s separate Privacy Notice.

2. What is a cookie?

A cookie is a small data file that a website or a service connected to a website may store in, or read from, a visitor’s browser or device. Cookies may support, among other things, session management, security functions, remembering visitor choices and, where appropriate consent has been given, statistical measurement or external content functions.

Session cookie: normally remains until the end of the browsing session.

Persistent cookie: remains on the device for a predefined period or until the visitor deletes it.

First-party cookie: is placed by the itpackshield.com domain.

Third-party cookie: is associated with an external service.

3. Cookie categories and consent

3.1. Strictly necessary / functional

These technologies are required for the Website’s essential operation, security, session handling or management of cookie choices. The YOOtheme Consent Manager “Functional” category is always active. Separate consent is not requested where a technology is strictly necessary to provide a service expressly requested by the visitor or for the essential operation of the Website.

3.2. Preferences

Preference technologies relate to visitor choices or external functions that are not strictly necessary. OpenStreetMap is included in this category on the Website. OpenStreetMap content is loaded only after the visitor grants permission.

3.3. Statistics / Analytics

Statistical technologies may help measure use of the Website. One such service may be Google Analytics 4. If the Website uses client-side Google Analytics cookies, they may be activated only in accordance with the applicable consent settings.

3.4. Marketing

No marketing cookie was identified during the present technical inspection. If the Website later introduces marketing or advertising technology, this Notice and the consent settings must be updated accordingly.

4. Cookies actually identified on the Website

The following list contains the public-facing Website cookies actually observed during a technical inspection performed on 26 September 2026 using the Firefox browser developer tools. The Joomla session-cookie name may be a random alphanumeric identifier that varies between installations or sessions; therefore, the exact technical name may change.

Cookie / technology	Provider	Purpose	Category	Party	Retention	Consent
Random Joomla session cookie (e.g. 5642a991… / e27d59a5…)	Joomla / Heftner Group Kft.	Supports the Website session and essential technical operation.	Necessary	First party	Until end of session	No
rsseoAnalyticsID	RSSeo / Heftner Group Kft.	Stores an identifier/setting related to the RSSeo Analytics integration.	Functional / analytics technical setting	First party	1 year	Depends on the specific analytics use; yes for analytics measurement
yootheme_consent_…	YOOtheme Pro / Heftner Group Kft.	Remembers the visitor's cookie and service-consent choices (e.g. permission for OpenStreetMap).	Necessary	First party	30 days	No

Note: during the inspection, the atumSidebarState and osColorScheme cookies associated with the /administrator path were also visible. These relate to settings of the Joomla administration interface and are not intended for functions used by visitors to the public Website; they are therefore not included in the visitor-cookie list above.

5. Google Analytics 4

Google Analytics / Search Console may be connected to the Website. However, during the browser-side cookie inspection on 26 September 2026, neither a _ga nor a _ga_<container-id> cookie appeared under itpackshield.com. They are therefore not included in the list of cookies actually identified in Section 4.

If client-side cookie-based Google Analytics 4 measurement is activated in the future or under a different consent state, Google's official documentation states the following default cookies:

Cookie	Purpose	Default retention	Category	Consent
_ga	Distinguishes unique users for statistical measurement.	2 years	Analytics	Yes
_ga_<container-id>	Maintains session state.	2 years	Analytics	Yes

Browsers may impose their own rules that shorten the effective lifetime of cookies. If the Google Analytics configuration changes, the cookie list must be checked again.

6. OpenStreetMap

The Website may use OpenStreetMap content. In the YOOtheme Consent Manager, OpenStreetMap belongs to the "Preferences" category and can be enabled separately by the visitor. Under YOOtheme's consent functionality, map content is not loaded before consent and no external request to OpenStreetMap is made until permission is granted.

During the inspection on 26 September 2026, no separate cookie belonging to an OpenStreetMap domain appeared in the browser cookie storage even after OpenStreetMap had been enabled. This Notice therefore does not list an OpenStreetMap cookie that was not observed. Loading the map may nevertheless involve technical data communication, such as transmission of the IP address and request data; details are provided in the Privacy Notice.

7. YouTube content

The Website may contain video content hosted on YouTube. YOOtheme Pro can block YouTube content until consent is granted and display a placeholder instead. In that configuration, the video connects to YouTube/Google systems only after the visitor gives permission.

During the cookie inspection on 26 September 2026, no separate YouTube cookie or YouTube-related cookie belonging to a Google domain appeared. Consequently, no YouTube cookie is listed in the current list of cookies actually identified. If the YouTube integration or consent configuration changes, a new technical inspection is required.

8. LinkedIn, search engines and AI-based search services

A simple LinkedIn link on the Website does not by itself place a LinkedIn cookie, provided that no LinkedIn plugin, pixel or tracking code is loaded. Crawling of the Website by Google and other search engines, or by AI-based search and indexing services, likewise does not in itself mean that those services place a cookie on the Website visitor's device.

9. YOOtheme Consent Manager and managing choices

The Website uses YOOtheme Pro Consent Manager. Through the Privacy Settings interface, visitors can view the categories, accept or reject non-essential technologies and later change a previous choice. The "Functional" category contains technologies required for essential operation, while OpenStreetMap can be enabled separately under the "Preferences" category.

The consent choice is stored in the first-party yootheme_consent_… cookie. During the technical inspection, its retention period was 30 days. Withdrawal of consent does not affect the lawfulness of processing carried out on the basis of valid consent before its withdrawal.

Cookie settings can be reopened through the Website's Privacy Settings / Cookie Settings interface. The YOOtheme Consent Manager can also technically be reopened using the #consent-settings link where this is made available in the Website menu or footer.

10. Browser settings

Most browsers allow users to view, delete, block or restrict cookies. Blocking all cookies may, however, cause certain essential Website functions to operate incorrectly or with limitations. Deleting cookies in the browser may also remove the YOOtheme consent cookie, in which case the Website may ask the visitor to make a new choice.

11. Website infrastructure providers and cookies

The Website is hosted by Sybell Informatika Kft., the email infrastructure is provided by Intergity Kft., and services related to domain registration are provided by Websupport. These provider roles do not in themselves mean that the relevant provider places a cookie in the browser of an itpackshield.com visitor. The technical inspection referred to in Section 4 therefore lists only cookies actually observed on the Website.

12. International data transfers

Activation of an external international service, such as Google/YouTube, may involve processing or transfer of personal data outside the European Economic Area. The detailed data-protection conditions and safeguards applicable to such transfers are described in the Website's Privacy Notice and in the current privacy documentation of the relevant service provider.

13. Review of the cookie list

Actual use of cookies and similar technologies may change together with the Website's technical configuration. Whenever a new Joomla extension, YOOtheme setting, analytics or marketing technology, embedded service or

consent configuration is introduced, the Website's cookies should be technically checked again and this Notice updated where necessary.

14. Amendments to this Notice

Heftner Group Kft. may amend this Cookie Notice, in particular where the Website's technical operation, the services used, cookie retention periods or applicable legal requirements change. The current version will be published on the Website.

15. Contact

For questions concerning this Cookie Notice or the cookies and similar technologies used on the Website:

Heftner Group Kft.

Registered office: 2013 Pomáz, Vróci utca 12., Hungary

Company registration number: 13-09-123295

Tax number: HU12710658

Email: sales@it-pack.com

Website: www.itpackshield.com

16. Technical and provider sources

The cookie list is based on the browser-side technical inspection carried out on 26 September 2026. The current official documentation of Google Analytics, YOOtheme Pro and the OpenStreetMap Foundation was taken into account when checking the operation of external services and their default cookie retention periods. Provider documentation may change; therefore, the actual Website configuration remains authoritative.
